PROFESSIONAL SUMMARY

Unity/C# Game Programmer with **5 years** of **professional experience** engineering, optimizing, and scaling **multiplayer games** for **mobile** and **PC** platforms. Skilled in designing **complex gameplay architecture**, building high-performance systems, and collaborating across departments to deliver **clean, maintainable code**.

SKILLS

Code: Unity3D, C#, OOP, SOLID, Design Patterns, SDK/API; **Networking:** Mirror, Netcode, Photon Fusion/Quantum, UGS; **UI & Frontend:** UI Toolkit, uGUI, IMGUI, Responsive/Data-Driven UI; **Performance:** Profiler, Frame Debugger, Addressables, Asset Bundles, UniTask

WORK EXPERIENCE

Unity Developer - BGNS Studios, Serbia

May 2024 - Present

- **Core Systems & Architecture:** Lead the design and implementation of complex player and staff management systems, handling **large-scale data** flows and progression logic for [PIX Football Manager](#), a highly anticipated title surpassing **3.5M+** views on **YouTube** via influencer and gameplay content.
- **Systems Engineering:** Architected a large-scale player drafting system handling scouting, recruitment, and lifecycle management of **2000+** dynamic entities per **weekly cycle** for [Draft Fever Bowl](#) (**AA** PC title), contributing to features that drove **5M+** social media **impressions**.
- **Pipeline & Tooling Management:** Directed a full **Scriptable Render Pipeline** migration (**HDRP > URP**), refactoring rendering-dependent systems, rewriting broken materials/**Shader Graphs**, and maintaining clear documentation to optimize development workflows.

Unity Developer - Triplano Games, Brazil

Jul 2023 - Jul 2024

- **Feature Development:** Translated complex design requirements into **scalable, clean,** and **maintainable C#** code for [Amazon Warriors](#), [Gloom](#) (**crypto-based** match-3), and multiple client projects in a **fast-paced** environment.
- **Mobile UI & Optimization:** Delivered highly responsive, **data-driven UI** systems (**uGUI**) tailored for performance-critical **mobile** devices.
- **Backend Integration:** Connected external services, **monetization** flows, and live operations via **Unity Gaming Services** (**UGS**), integrating **Ads**, **Remote Config**, and **Analytics**.

Unity Developer - Advance Garde, Brazil

Dec 2021 - Dec 2023

- **Multiplayer Architecture:** Owned and **led** the entire **multiplayer** architecture using **Mirror (P2P)** over a **2-year** development cycle for [Rogue Masters](#) (**AA Steam** title supporting **6** players/session and **hundreds** of concurrent users). Engineered **client-server** communication, state synchronization, **RPC** handling, **matchmaking**, and **latency mitigation**.
- **Mentorship & Collaboration:** Collaborated closely with art, design, and production teams while working within a complex **4-year-old** codebase; actively **mentored** junior programmers and conducted peer **code reviews**.
- **LiveOps & Support:** Maintained the **build** and release **pipeline** post-launch, delivering continuous optimization updates for **CPU**, **memory**, and **network** performance based on **live player feedback**.

Unity Developer - Main Leaf Games, Brazil

Aug 2021 - Dec 2023

- **Gameplay & AI Systems:** Developed responsive mobile **UI** systems and **AI** behaviors for high-profile **mobile** projects like [Pet Shop Fever](#) (**1M+** downloads on **iOS/Android**).
- **Advanced Networking:** Contributed to [UniqKiller](#), implementing **multiplayer competitive** systems using **Photon Fusion** with **dedicated** servers for up to **12** players **per match**.
- **Memory Optimization:** Built and optimized asset management pipelines using **Addressables** and **Asset Bundles**, significantly reducing mobile **build sizes** and improving **loading** times.

LANGUAGES

Portuguese: Native | **English:** Professional proficiency (advanced) | **Spanish:** Beginner

EDUCATION

Bachelor of Technology in Digital Game Development - FMU, Brazil (Feb 2019 - July 2021)
